Veggie Prints Project
Inspired by Jasper Johns

Supplies:
Paint
Vegetables
Paper
1: Choose a vegetable and cut it in half.
For this example we are using a potato. But any veggie will be fun to use.

2: Cut a shape into the potato.
Veggies like celery and cabbage already have interesting shapes.

3: Pour some paint onto a plate.
Tempera paint works well.

4: Dip veggie into the paint.
Cover the surface of the shape you want to print.

5: Press painted veggie onto the paper.
Make a PRINT!

6: Repeat the printmaking process and have fun experimenting!
Make patterns, overlap shapes and mix colors on your paper.

Share your artwork!
Printmaking allows artists to make multiples of their artwork.
Make lots of prints to give to friends and family as heartfelt gifts or holiday cards!
